Shows the total number of activities in allocated course

Get Started

1. Select the large 'Reports' icon
2. Choose your class using the Class filter at the top
3. The default view shows results for the current academic year, use the date filter to change the date range
4. 'Activity Mastery' shows progress towards course completion
5. 'Participation' shows the total number of points and certificates earned by class or pupil
6. 'Live Mathletics' shows more detailed results for fluency and mental maths

Reward Effort

Use Reports to celebrate achievement, maintain engagement and monitor progress. Using certificates to acknowledge effort is inclusive because all children earn certificates regardless of ability.

Refresh

Show real-time results using the 'Refresh' button and monitor pupil progress and understanding during lessons.

Create Balance

If you notice that students are spending most of their time on Live Mathletics, encourage them to spend more time on the Curriculum content by reminding them that 10 points are available per correct answer rather than 1 point in Live Mathletics.

Celebrate Success

Print complete pupil reports and use to discuss areas for development with individual children. These can also be useful for report writing and parent's evenings.

Hold a weekly certificate presentation and create a classroom or school wall of fame for certificates.
